SHAKESPEARE®

390-1MG

276" (7.0 M) SSB SHIPBOARD ANTENNA | 2–30 MHZ

Shakespeare® 390-1MG is a lightweight, 23 ft (7.0 m) SSB shipboard antenna engineered for reliable communications across the 2–30 MHz frequency range when used with an external antenna tuner. Designed for small- to medium-sized vessels and fixed-station applications, this antenna features a durable, two-section epoxy fiberglass composite construction engineered for strength, corrosion resistance, and dependable performance in demanding military naval environments.

Built to withstand wind speeds up to 100 mph (160 km/h), 390-1MG supports up to 1 kW RF power and features a four-bolt mounting flange for secure deck installation.
